**DETAILED ACTION**

**Information Disclosure Statement**

1. ***The information disclosure statements filed 05/30/01 & 08/10/01 have been considered and placed in the application file.***

**Election/Restrictions**

2. ***Applicant's election of the Group II(claims 8-16, 26 & 27) invention in Paper No. 8 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)). Accordingly, claims 1-7, 17-25 and 28-33 stand withdrawn from consideration by the Examiner as per having been drawn to a non-elected invention.***

**Claim Rejections - 35 USC § 112**

3. ***The following is a quotation of the second paragraph of 35 U.S.C. 112:***

***The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.***

4. ***Claims 8-16, 26 and 27 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.***

***A) The recited contents per claims 8, 9, 26 and 27 constitute indefinite subject matter as per it not being readily ascertainable as to the exact entity that said contents are being based on, i.e., total coating composition or else.***

***B) The recited "about less than" per claims 8, 9, 15, 26 and 27 constitutes indefinite subject matter as per the metes and bounds of said phrase engender an indeterminacy in scope.***

***C) The recited monomer ester" per claim 26 engenders awkwardly expressed claim language. Use of "ester monomer" is suggested in lieu of "monomer ester" so as to engender claim language clarity.***

**Claim Rejections - 35 USC § 102**

Art Unit: 1713

5. *The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:*

*A person shall be entitled to a patent unless –*

*(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.*

6. *The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:*

*(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.*

7. *Claims 8-16, 26 and 27 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Magat et al(U.S. 3,514,385), Yoshida et al(U.S. 3,986,875) or Liao et al(U.S. 5,387,318) .*

*Magat et al disclose solutions of an organic compound, applied to a textile substrate, wherein said solutions are defined basically as containing ethylenically unsaturated monomers which include (meth)acrylamide, (meth)acrylic acid esters, salts and esters of sulfonic acid, etc., non-polymerizable compounds which include water and/or alcohols, polymeric modifiers which include polyacrylamide, etc. See, e.g., the Abstract, cols. 1, 3, 9-13 and the Runs of Magat et al. Yoshida et al disclose image receiving layers comprising a spacer layer which comprises a solution, in a water/alcohol admixture, of mono(meth)acrylates/other comonomers grafted to polyacrylamide. See the paragraph bridging cols. 3 to 4 and col. 4 of Yoshida et al. Liao et al teach graft copolymers, useful for water treatment, wherein the graft copolymer comprises a macromonomer of acrylamide, vinyl monomers which include polyethylene glycol di(meth)acrylates, etc. + a branching agent which includes lower alcohols such as isopropanol and other conventional adjutants such as water. See, col. 4 and the Runs of Liao et al.*

Art Unit: 1713

*Each of Magat et al, Yoshida et al and Liao et al therefore anticipate the instantly claimed invention with the understanding that the components of each of patentees overlaps in scope with the claimed components, in both content and character, with the understanding that "about less than" includes "zero" .*

*As to the dependent claims, the limitations are either taught by patentees, suggested by patentees or would have been obvious too the skilled artisan and with a reasonable expectation of success. The discovery of a new property or use for a previously known compound cannot impart patentability to claims to that compound, even if the property or use is unobvious(In re Schoenwald, 22 USPQ 1671).*

#### **Conclusion**

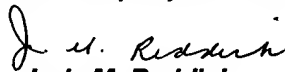

*8. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.*

*9. The additional prior art listed on the FORM PTO-892 is cited as of being of interest in teaching compositions similar to those as claimed and is considered merely cumulative to the prior art supra.*
